

POWERTEC®**Metal Drop Leaf Supports**

The drop leaf supports are mounted to the underside of the table and when pulled out allow the table leaf to be raised level with the table top.

- The drop leaf supports work with drop leaves up to 10" wide.
- The retracted support is 14-3/4" long so table top must be at least 15" wide.
- Each drop leaf support will accommodate 50 lbs for a total of 100 lbs per pair.

PACKAGING CONTENTS

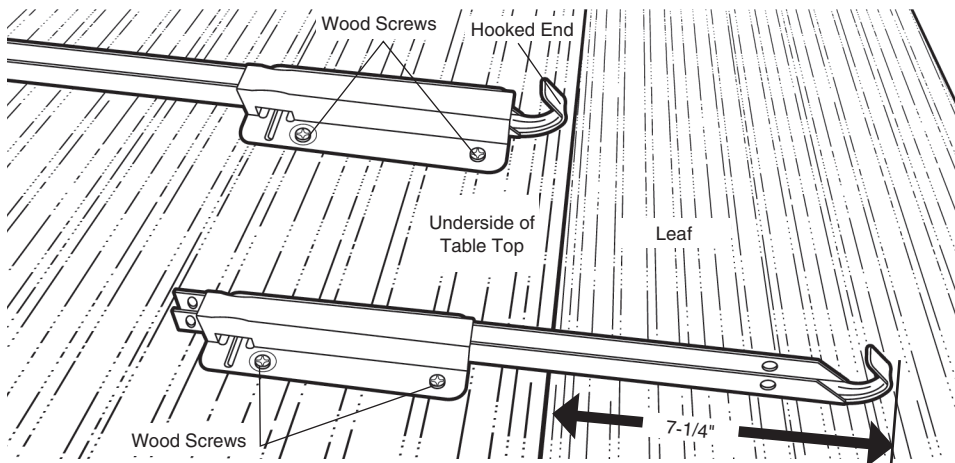

2 - Drop Leaf Supports

8 - Flat Head Wood Screws 5/8" #8

ASSEMBLY

NOTE: The drop leaf supports are mounted to the underside of the table top.

1. The location of the supports will depend on the size of the table leaf. Evenly space the supports for maximum stability. If using a single support for a small leaf, mounting it in the center is sufficient.
2. When the placement of the support is determined, place the support on the underside of the table top. Make sure the hook end of the support is pushed all the way in and align the hook with the edge of the table top. This will allow the leaf to swing freely when not supported.
3. Hold the support in place and mark the holes to be drilled.
4. Drill the pilot holes into the table top. Make sure not to drill through the table top.
5. Attach the drop leaf support to the table top with the 5/8" #8 wood screws.
6. Repeat to assemble the other drop leaf support.
