

### TO USE

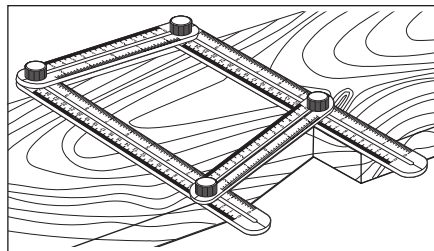

1. Loosen the four locking knobs.
2. Pull apart the long arms.
3. Guide the short arms into the desired shape or angle to create a template to be used on wood, laminate, tile, brick, stone, lumber and other materials. The template can be used to:
  - create bullseyes, arches and plumb cuts
  - cut birds mouth rafters
  - mark flooring for cutting
  - measure distances for corbels
  - use as a 10 mm guage for standard brick joints
  - draw circles
  - create unlimited templates, take measurements or use in any application imaginable, this tool is only limited to the imagination
4. When desired shape or angle is reached tighten the locking knobs.

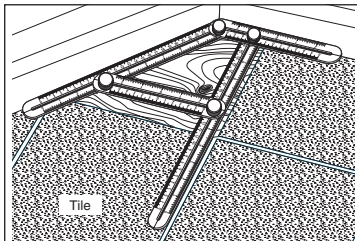

**NOTE:** The tool may be assembled with the short arms on the bottom and the long arms on the top, if needed. Remove the locking knobs, place the long arms on top of the short arms and replace the locking knobs.

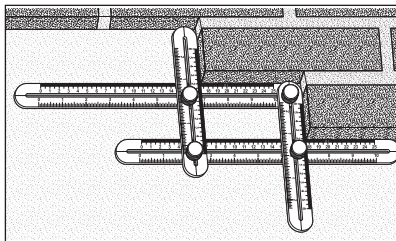

Templates for bullseyes and arches

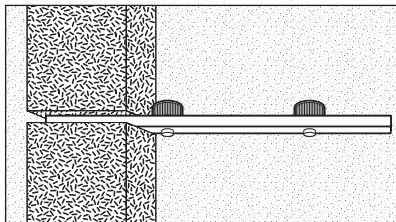

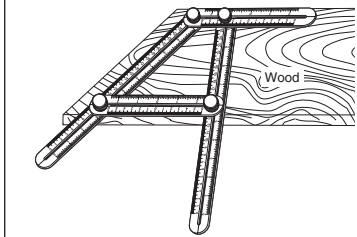

Make a template to cut birds mouth rafters

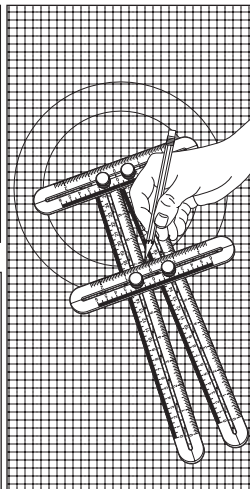

Mark flooring for cutting

Measure distances for corbels

Gauge standard brick joints (10 mm)

Mark circles
